

# NERC CIP DEEP DIVE (virtual)

October 13 - 15, 2020

## Course Overview

This online NERC Critical Infrastructure Protection (CIP) course provides foundational and background information on the standards and a comprehensive look at the latest versions of standards CIP-002 through CIP-014. Each requirement will be discussed in detail along with approaches that meet compliance expectations. This online program is a combination of self-study, online instructor-led review, and discussion that maps to days 1-3 of the week-long NERC CIP Bootcamp.
